Journal of Testing and Evaluation
Table of Contents, Volume 9
1981

No. 1, January

Void Content Prediction in Two-Size Aggregate Mixes—MOHAMMED AL-JARALLAH AND EGONS TONS 3
The Influence of Some Variables on Extraction Results of Wool Top—S. A. LARSEN AND RAJ KUMAR 11
A Simple Test Method for the Evaluation of Tearing Modulus—HIDEAKI TAKAHASHI, M. A. KAHN, AND MASAHIKO SUZUKI 14
Effect of Specimen Shape and Cyclic Loading on Tension Tests of Two Epoxy Resins—W. N. FINDLEY AND R. M. REED 24
A Comparative Study of the Effect of Low Temperature on the Fracture Toughness and Cyclic Properties of Two Candidate High-Strength Low-Alloy Steels for Arctic Pipeline Applications—M. R. KRISHNADEV, L. R. CUTLER, AND A. GALIBOIS 28
A Procedure for Strain-Controlled High-Cycle Fatigue Testing at Elevated Temperatures—S. MAJUMDAR, D. T. RASKE, AND W. F. BURKE 35
Effect of Understressing and Coaxing on the Fatigue Limit of a Transverse Butt-Welded Joint—J. J. LAWNICKI AND V. C. CUTLER 39
Statistical Fatigue Failure Analysis—G. G. TRANTINA 44
Chevron V-Notched Bend Specimen for K_{Ic} Measurement of Brittle Materials—T. T. SHIH 50
On the Relationship Between Stretch Zone Formation and the J Integral for High Strain-Hardening Materials—W. J. MILLS 56

No. 2, March

Review of New Developments in Crack Propagation Studies—M. H. EL HADDAD, T. H. TOPPER, AND B. MUKHERJEE 65
Scale and Corrosion Parameters at a Geothermal Loop Experimental Facility—W. O. JACOBSON, A. N. ROGERS, FRED SCHOEPFLIN, AND P. M. HENRY 82
Quenching, Tempering, and Aging Chromium-Molybdenum-Vanadium Cast Steels—P. A. COULON, CLAUDE LEYMONIE, HENRI SAISSE, AND GUY THAUVIN 93
Comparison of Methods for Fracture Toughness Determination in Steels—M. M. COBANOGLU AND GEZA KARDOS 104
On the Relationship of Toughness, Fracture Initiation Energy, and Specimen Deflection in Charpy Tests of 4340 Steel—K. P. DATTA AND W. E. WOOD 111
Verification of Compliance Corrections Used in Determining Load-Line Energies from Dynamic Load-Time Data—PAUL MCCONNELL 118
A Fracture Toughness Data Bank—J. G. KAUFMAN AND S. F. COLLIS 121
An Optimal Method for Determining Anisotropic Parameters Under Combined Stress Tests—KOZO IKEGAMI 127
Simplified Equations for Peak Position and for Its Standard Deviation in X-Ray Stress Measurement—MASANORI KURITA 133
Some Aspects of Biaxial Creep Testing of Thin-Walled Cylindrical and Spherical Pressure Vessels—ABIR ARBEL AND DAN ELIEZER 141
Task Group Report: Results of Interlaboratory Test Programs to Evaluate the Eynamic Tear Test Method—N. A. LAZARIDIS, T. G. HEBERLING, E. S. HARRIS, AND E. A. LANGE 144
Discussion and Response—H. L. EWALDS; OLDRICH VOSIKOVSKY 158

No. 3, May

Multiaxial Fatigue: A Survey of the State of the Art—Y. S. GARUD 165
Similarities in Different Experiments of Erosion Caused by Cavitation and Liquid Impingement—P. VEERABHADRA RAO AND B. C. SYAMALA RAO 179
Estimation of Cavitation Erosion with Incubation Periods and Material Properties—P. VEERABHADRA RAO, C. SAMUEL MARTIN, B. C. SYAMLA RAO, AND N. S. LAKSHMANA RAO 189
Sampling Plans with Low Consumers' Risk—J. B. TYE 198
Quality Control of Tests Conducted on Bituminous Mixtures in Quebec—PIERRE ZAIKOFF, ALAIN BOUCHARD, AND RICHARD LANGLOIS 204
The Measurement of Absorbed Charpy Impact Energy Using a Vertical Drop Tower—W. L. SERVER AND G. R. HENDERSON 210
Precision Strain Measurement at Elevated Temperatures Using a Capacitance Probe—R. L. KEUSSEYAN AND CHE-YU LI 214

Technical Note: Application of the Electrical Potential Method to Crack Length Measurements Using Johnson's Formula—K.-H. SCHWALBE AND DIETER HELLMAN 218

No. 4, July

A Critical Evaluation of Pulse Collectors for Utilities—R. M. JENSEN 165
Laboratory Testing of Asphalt Concrete for Porous Pavements—G. A. WOELFL, I. W. WEI, C. N. FAULSTICH, AND H. S. LITWACK 175
R Curve and Fracture Toughness of Thin Sheet Materials—K.-H. SCHWALBE AND W. SETZ 182
Some Aspects of Fatigue Crack Closure in Two Contrasting Titanium Alloys—M. D. HALLIDAY AND C. J. BEEVERS 195
A Biaxial Fatigue Machine for Elevated Temperature Testing—M. W. BROWN AND K. J. MILLER 202
The Effects of Stress Dwells and Varying Mean Strain on Crack Growth During Thermal Mechanical Fatigue—A. E. GEMMA, F. X. ASHLAND, AND R. M. MASCI 209
Some Intensity Factors for Single-Edge-Crack Solid and Hollow Round Bars Loaded in Tension—A. J. BUSH 216

No. 5, September

A Statistical Analysis of X-ray Stress Measurement by the Gaussian Curve-Fitting Method—MASANORI KURITA 285
A Constant Force System for Delayed Fracture Experiments—G. W. WYCHERLEY AND S. G. HENSHALL 292
Crack Initiation, Slow Crack Growth, and Unstable Propagation of Ductile Fracture in Mild Steels in a Laboratory Experiment—MASAO OGASAWARA, YUKIHISA KURIYAMA, TOSHITAKA TAMANO, HIROSHI MIMURA, AND SAMON YANAGIMOTO 296
Simultaneous Determination of Shear and Young's Moduli in Composites—SOLOMON FISCHER, ITZHAK ROMAN, HANNAH HAREL, GAD MAROM, AND H. D. WAGNER 303
Evaluation of Assembly Stresses of Automotive Leaf Springs by Acoustic Emission—J. C. BARAM, SIMON ECKHAUS, AND MOSHE ROSEN 308
Design of a Dynamic Gear Test Rig—R. J. CRAWFORD AND DAVID BROWN 311
Hydrogen Embrittlement of Zinc Coatings—E. W. HORVICK 315
Erratum 314

No. 6, November

Fatigue Crack Growth Rate Data Acquisition System for Linear and Nonlinear Fracture Mechanics Applications—J. J. RUSCHAU 317
Determination of Crack Tip Energy Dissipation and Elastic-Plastic Fracture Toughness Parameter with Ductile Crack Extension—TETSUO SHOJI 324
An Evaluation of a Load-Line Extensometer for Elastic-Plastic Fracture Toughness Testing—J. A. WILLIAMS AND K. W. CARLSON 335
Fundamentals of Combustion Toxicology in Fire Hazard Assessment—S. C. PACKHAM AND G. E. HARTZELL 341
Residual Stress Profile in Machined Parts—AVIEZER ISRAELI AND REUVEN PAPIAR 348
Magnetic Properties of Iron and Low Carbon Steel for Soft Magnet Applications—J. L. STOKES 354
Erosion Behavior of Polystyrene—C. M. THAI, KEN TSUDA, AND HIDEMITSU HOJO 359

Zaikoff, P., Bouchard, A., and Langlois, R.: Quality control of tests conducted on bituminous mixtures in Quebec, May, 204

Journal of Testing and Evaluation
Subject Index to Volume 9
1981

A-B

Aggregates
Laboratory testing of asphalt concrete for porous pavements (Woelfl, Wei, Faulstich, and Litwach), July, 175
Void content prediction in two-size aggregate mixes (Al-Jarallah and Tons), Jan., 3

Alloy steels
Simple test method for the evaluation of tearing modulus (Takahashi, Khan, and Suzuki), Jan., 14

Aluminum alloys
Fracture toughness data bank (Kaufman and Collis), March, 121

Anisotropy
Optimal method for determining anisotropic parameters under combined stress tests (Ikegami), March, 127

Axial strain
Procedure for strain-controlled high-cycle fatigue testing at elevated temperatures (Majumdar, Raske, and Burke), Jan., 35

Bend tests
Simultaneous determination of shear and Young's moduli in composites (Fischer, Roman, Harel, Marom, and Wagner), Sept., 303

Bituminous concretes
Laboratory testing of asphalt concrete for porous pavements (Woelfl, Wei, Faulstich, and Litwach), July, 175
Quality control of tests conducted on bituminous mixtures in Quebec (Zaikoff, Bouchard, and Langlois), May, 204

C

Cavitation
Estimation of cavitation erosion with incubation periods and material properties (Veerabhadra Rao, Martin, Syamala Rao, and Lakshmana Rao), May, 189

Cavitation corrosion
Similarities in different experiments of erosion caused by cavitation and liquid impingement (Veerabhadra Rao and Syamala Rao), May, 179

Ceramics
Chevron v-notched bend specimen for K_{1c} measurement of brittle materials (Shih), Jan., 50

Chemical etching
Residual stress profile in machined parts (Israeli and Papiar), Nov., 348

Closures
Some aspects of fatigue crack closure in two contrasting titanium alloys (Halliday and Beevers), July, 195

Coal
Critical evaluation of pulse collectors for utilities (Jensen), July, 165

Coercive force
Magnetic properties of iron and low carbon steel for soft magnet applications (Stokes), Nov., 354

Consumers
Sampling plans with low consumers' risk (Tye), May, 198

Correlation
Similarities in different experiments of erosion caused by cavitation and liquid impingement (Veerabhadra Rao and Syamala Rao), May, 179

Corrosion fatigue
Discussion of "effects of stress ratio on fatigue crack growth rates in X70 pipeline steel in air and saltwater" by Oldrich Vosikovsky (Ewalds), March, 158

Corrosion resistance
Scale and corrosion parameters at a geothermal loop experimental facility (Jacobson, Rogers, Schoepflin, and Henry), March, 82

Crack propagation
Application of the electrical potential method to crack length measurements using Johnson's formula (Hellmann and Schwalbe), May, 218
Crack initiation, slow crack growth, and unstable propagation of ductile fracture in mild steels in a laboratory experiment (Ogasawara, Kuriyama, Tamano, Mimura, and Yanagimoto), Sept., 296
Determination of crack tip energy dissipation and elastic-plastic fracture toughness parameter with ductile crack extension, (Shoji), Nov., 324
Discussion of "effects of stress ratio on fatigue crack growth rates in X70 pipeline steel in air and saltwater" by Oldrich Vosikovsky (Ewalds), March, 158
Effects of stress dwells and varying mean strain on crack growth during thermomechanical fatigue (Gemma, Ashland, and Masci), July, 209
Evaluation of load-line extensometer for elastic-plastic fracture toughness testing (Williams and Carlson), Nov., 335
Fatigue crack growth rate data acquisition system for linear and nonliner fracture mechanics applications (Ruschau), Nov., 317
R curve and fracture toughness of thin sheet materials (Schwalbe and Setz), July, 182
Review of new developments in crack propagation studies (El Haddad, Topper, and Mukherjee), March, 65
Simple test method for the evaluation of tearing modulus (Takahashi, Khan, and Suzuki), Jan., 14
Some aspects of fatigue crack closure in two contrasting titanium alloys (Halliday and Beevers), July, 195

Cracking (fracturing)
On the relationship between stretch zone formation and the *J* integral for high strain-hardening materials (Mills), Jan., 56
Stress intensity factors for single-edge-crack solid and hollow round bars loaded in tension (Bush), July, 216

Creep tests
Some aspects of biaxial creep testing of thin-walled cylindrical and spherical pressure vessels (Arbel and Eliezer), March, 141

Cyclic loads
Biaxial fatigue machine for elevated temperature testing (Brown and Miller), July, 202
Effect of specimen shape and cyclic loading on tension tests of two epoxy resins (Findley and Reed), Jan., 24
Multiaxial fatigue: a survey of the state of the art (Garud), May, 165

D-E

Data storage
Fracture toughness data bank (Kaufman and Collis), March, 121

Determination of stress
Simplified equations for peak position and for its standard deviation in X-ray stress measurement (Kurita), March, 133

Ductility
Crack initiation, slow crack growth, and unstable propagation of ductile fracture in mild steels in a laboratory experiment (Ogasawara, Kuriyama, Tamano, Mimura, and Yanagimoto), Sept., 296

Dynamic tests
Task group report: results of interlaboratory test programs to evaluate the dynamic tear test method (Lazaridis, Heberling, Harris, and Lange), March, 144
Verification of compliance corrections used in determining load-line energies from dynamic load-time data (McConnell), March, 118

Dynamometers
Design of a dynamic gear test rig (Crawford and Brown), Sept., 311

Eddy current
Design of a dynamic gear test rig (Crawford and Brown), Sept., 311

Electric power plants
Critical evaluation of pulse collectors for utilities (Jensen), July, 165

Energy
Measurement of absorbed Charpy impact energy using a vertical drop tower (Server and Henderson), May, 210

Environmental tests
Constant force system for delayed fracture experiments (Wycherley and Henshall), Sept., 292

Epoxy resins
Effect of specimen shape and cyclic loading on tension tests of two epoxy resins (Findley and Reed), Jan., 24

Erosion
Erosion behavior of polystyrene (Thai, Tsuda, and Hojo), Nov., 359
Estimation of cavitation erosion with incubation periods and material properties

(Veerabhadra Rao, Martin, Syamala Rao, and Lakshmana Rao), May, 189

Erosion corrosion
Similarities in different experiments of erosion caused by cavitation and liquid impingement (Veerabhadra Rao and Syamala Rao), May, 179

Expressions (mathematics)
Some aspects of biaxial creep testing of thin-walled cylindrical and spherical pressure vessels (Arbel and Eliezer), March, 141

Extensometers
Biaxial fatigue machine for elevated temperature testing (Brown and Miller), July, 202
Evaluation of load-line extensometer for elastic-plastic fracture toughness testing (Williams and Carlson), Nov., 335

Extraction
Influence of some variables on extraction results of wool top (Larsen and Kumar), Jan., 11

F

Fatigue (materials)
Effect of understressing and coaxing on the fatigue limit of a transverse butt-welded joint (Lawnicki and Cutler), Jan., 39
Fatigue crack growth rate data acquisition system for linear and nonliner fracture mechanics applications (Ruschau), Nov., 317
Multiaxial fatigue: a survey of the state of the art (Garud), May, 165
Review of new developments in crack propagation studies (El Haddad, Topper, and Mukherjee), March, 65
Some aspects of fatigue crack closure in two contrasting titanium alloys (Halliday and Beevers), July, 195
Statistical fatigue failure analysis (Trantina), Jan., 44

Fatigue limit
Effect of understressing and coaxing on the fatigue limit of a transverse butt-welded joint (Lawnicki and Cutler), Jan., 39

Fatigue tests
Effects of stress dwells and varying means strain on crack growth during thermomechanical fatigue (Gemma, Ashland, and Masci), July, 209
Procedure for strain-controlled high-cycle fatigue testing at elevated temperatures (Majumdar, Raske, and Burke), Jan., 35

Fires
Fundamentals of combustion toxicology in fire hazard assessment (Packham and Hartzell), Nov., 341

Fly ash
Critical evaluation of pulse collectors for utilities (Jensen), July, 165

Fractures (materials)
Application of the electrical potential method to crack length measurements using Johnson's formula (Hellmann and Schwalbe), May, 218
Comparison of methods for fracture toughness determination in steels (Cobanoglu and Kardos), March, 104
Determination of crack tip energy dissipation and elastic-plastic fracture toughness parameter with ductile crack extension (Shoji), Nov., 324
On the relationship between stretch zone formation and the J integral for high strain-hardening materials (Mills), Jan., 56
Task group report: results of interlaboratory test programs to evaluate the dynamic tear test method (Lazaridis, Heberling, Harris, and Lange), March, 144

Fracture properties
Review of new developments in crack propagation studies (El Haddad, Topper, and Mukherjee), March, 65

Fracture tests
Chevron v-notched bend specimen for K_{Ic} measurement of brittle materials (Shih), Jan., 50
Constant force system for delayed fracture experiments (Wycherley and Henshall), Sept., 292
Crack initiation, slow crack growth, and unstable propagation of ductile fracture in mild steels in a laboratory experiment (Ogaswara, Kuriyama, Tamano, Mimura, and Yanagimoto), Sept., 296
Evaluation of load-line extensometer for elastic-plastic fracture toughness testing (Williams and Carlson), Nov., 335

Frequency distribution
Procedure for strain-controlled high-cycle fatigue testing at elevated temperatures (Majumdar, Raske, and Burke), Jan., 35

H-L

High strength steels
Comparative study of the effect of low temperature on the fracture toughness and cyclic properties of two candidate high-strength low-alloy steels for arctic pipeline applications (Krishnadev, Cutler, and Galibois), Jan., 28

High temperature
Scale and corrosion parameters at a geothermal loop experimental facility (Jacobson, Rogers, Schoepflin, and Henry), March, 82

High temperature tests
Precision strain measurement at elevated temperatures using a capacitance probe (Keusseyan and Li), May, 214

Hot dip coating
Hydrogen embrittlement of zinc coatings (Horvick), Sept., 315

Hydrogen embrittlement
Hydrogen embrittlement of zinc coatings (Horvick), Sept., 315

Impact
Erosion behavior of polystyrene (Thai, Tsuda, and Hojo), Nov., 359

Impact tests
Measurement of absorbed Charpy impact energy using a vertical drop tower (Server and Henderson), May, 210
Verification of compliance corrections used in determining load-line energies from dynamic load-time data (McConnell), March, 118

Iron
Magnetic properties of iron and low carbon steel for soft magnet applications (Stokes), Nov., 354

Leaf springs
Evaluation of assembly stresses of automotive leaf springs by acoustic emission (Baram, Eckhaus, and Rosen), Sept., 308

Loads (forces)
Constant force system for delayed fracture experiments (Wycherley and Henshall), Sept., 292
Verification of compliance corrections used in determining load-line energies from dynamic load-time data (McConnell), March, 118

Low alloy steels
Comparative study of the effect of low temperature on the fracture toughness and cyclic properties of two candidate high-strength low-alloy steels for arctic pipeline applications (Krishnadev, Cutler, and Galibois), Jan., 28

M-Q

Magnetic properties
Magnetic properties of iron and low carbon steel for soft magnet applications (Stokes), Nov., 354

Mechanical properties
Comparative study of the effect of low temperature on the fracture toughness and cyclic properties of two candidate high-strength low-alloy steels for arctic pipeline applications (Krishnadev, Cutler, and Galibois), Jan., 28
Comparison of methods for fracture toughness determination in steels (Cobanoglu and Kardos), March, 104
On the relationship of toughness, fracture initiation energy, and specimen deflection in charpy tests of 4340 steel (Datta and Wood), March, 111
Simultaneous determination of shear and Young's moduli in composites (Fischer, Roman, Harel, Marom, and Wagner), Sept., 303

Modulus of elasticity
Fatigue crack growth rate data acquisition system for linear and nonliner fracture mechanics applications (Ruschau), Nov., 317
Simultaneous determination of shear and Young's moduli in composites (Fischer, Roman, Harel, Marom, and Wagner), Sept., 303

Nondestructive tests
Evaluation of assembly stresses of automotive leaf springs by acoustic emission (Baram, Eckhaus, and Rosen), Sept., 308

Pavements
Laboratory testing of asphalt concrete for porous pavements (Woelfl, Wei, Faulstich, and Litwach), July, 175

Plastic deformation
Determination of crack tip energy dissipation and elastic-plastic fracture toughness parameter with ductile crack extension (Shoji), Nov., 324

Polystyrene
Erosion behavior of polystyrene (Thai, Tsuda, and Hojo), Nov., 359

Potential theory
Application of the electrical potential method to crack length measurements using Johnson's formula (Hellmann and Schwalbe), May, 218

Predictions
Estimation of cavitation erosion with incubation periods and material properties (Veerabhadra Rao, Martin, Syamala Rao, and Lakshmana Rao), May, 189
Pressure vessels
Some aspects of biaxial creep testing of thin-walled cylindrical and spherical pressure vessels (Arbel and Eliezer), March, 141
Quality assurance
Sampling plans with low consumers' risk (Tye), May, 198
Quality control
Influence of some variables on extraction results of wool top (Larsen and Kumar), Jan., 11
Quality control of tests conducted on bituminous mixtures in Quebec (Zaikoff, Bouchard, and Langlois), May, 204
Quench hardening
Statistical analysis of X-ray stress measurement by the Gaussian curve-fitting method (Kurita), Sept., 285
Quenching (cooling)
Quenching, tempering, and aging chromium-molybdenum-vanadium cast steels (Coulon, Leymonie, Saisse, and Thauvin), March, 93

R-S

Residual stress
Residual stress profile in machined parts (Israeli and Papiar), Nov., 348
Simplified equations for peak position and for its standard deviation in X-ray stress measurement (Kurita), March, 133
Statistical analysis of X-ray stress measurement by the Gaussian curve-fitting method (Kurita), Sept., 285
Sampling
Quality control of tests conducted on bituminous mixtures in Quebec (Zaikoff, Bouchard, and Langlois), May, 204
Sampling plans with low consumers' risk (Tye), May, 198
Scale corrosion
Scale and corrosion parameters at a geothermal loop experimental facility (Jacobson, Rogers, Schoepflin, and Henry), March, 82
Smoke
Fundamentals of combustion toxicology in fire hazard assessment (Packham and Hartzell), Nov., 341
Spur gears
Design of a dynamic gear test rig (Crawford and Brown), Sept., 311
Stability
R curve and fracture toughness of thin sheet materials (Schwalbe and Setz), July, 182
Statistical analysis
Statistical fatigue failure analysis (Trantina), Jan., 44
Steel Castings
Quenching, tempering, and aging chromium-molybdenum-vanadium cast steels (Coulon, Leymonie, Saisse, and Thauvin), March, 93
Steels
On the relationship of toughness, fracture initiation energy, and specimen deflection in Charpy tests of 4340 steel (Datta and Wood), March, 111
Strain measurement
Precision strain measurement at elevated temperatures using a capacitance probe (Keusseyan and Li), May, 214
Strains
On the relationship between stretch zone formation and the *J* integral for high strain-hardening materials (Mills), Jan., 56
Stress ratio
Discussion of "effects of stress ratio on fatigue crack growth rates in X70 pipeline steel in air and saltwater" by Oldrich Vosikovsky (Ewalds), March, 158
Stresses
Evaluation of assembly stresses of automotive leaf springs by acoustic emission (Baram, Eckhaus, and Rosen), Sept., 308
Multiaxial fatigue: a survey of the state of the art (Garud), May, 165
Optimal method for determining anisotropic parameters under combined stress tests (Ikegami), March, 127
Stress intensity factors for single-edge-crack solid and hollow round bars loaded in tension (Bush), July, 216

T-Z

Tear strength
Simple test method for the evaluation of tearing modulus (Takahashi, Khan, and Suzuki), Jan., 14
Tear tests
Task group report: results of interlaboratory test programs to evaluate the dynamic tear test method (Lazaridis, Heberling, Harris, and Lange), March, 144
Temperature control
Biaxial fatigue machine for elevated temperature testing (Brown and Miller), July, 202
Tempering
Quenching, tempering, and aging chromium-molybdenum-vanadium cast steels (Coulon, Leymonie, Saisse, and Thauvin), March, 93
Tension
Stress intensity factors for single-edge-crack solid and hollow round bars loaded in tension (Bush), July, 216
Tension tests
Effect of specimen shape and cyclic loading on tension tests of two epoxy resins (Findley and Reed), Jan., 24
Precision strain measurement at elevated temperatures using a capacitance probe (Keusseyan and Li), May, 214
Thermal fatigue
Effects of stress dwells and varying mean strain on crack growth during thermomechanical fatigue (Gemma, Ashland, and Masci), July, 209
Toughness
Chevron v-notched bend specimen for K_{Ic} measurement of brittle materials (Shih), Jan., 50
Comparison of methods for fracture toughness determination in steels (Cobanoglu and Kardos), March, 104
Fracture toughness data bank (Kaufman and Collis), March, 121
On the relationship of toughness, fracture initiation energy, and specimen deflection in Charpy tests of 4340 steel (Datta and Wood), March, 111
R curve and fracture toughness of thin sheet materials (Schwalbe and Setz), July, 182
Toxicity
Fundamentals of combustion toxicology in fire hazard assessment (Packham and Hartzell), Nov., 341
Turning (machining)
Residual stress profile in machined parts (Israeli and Papiar), Nov., 348
Velocity measurement
Measurement of absorbed Charpy impact energy using a vertical drop tower (Server and Henderson), May, 210
Voids
Void content prediction in two-size aggregate mixes (Al-Jarallah and Tons), Jan., 3
Volume
Void content prediction in two-size aggregate mixes (Al-Jarallah and Tons), Jan., 3
Weibull density functions
Statistical fatigue failure analysis (Trantina), Jan., 44
Welded joints
Effect of understressing and coaxing on the fatigue limit of a transverse butt-welded joint (Lawnicki and Cutler), Jan., 39
Wool
Influence of some variables on extraction results (Larsen and Kumar), Jan., 11
X-ray stress analysis
Simplified equations for peak position and for its standard deviation in X-ray stress measurement (Kurita), March, 133
Statistical analysis of X-ray stress measurement by the Gaussian curve-fitting method (Kurita), Sept., 285
Yield strength
Optimal method for determining anisotropic parameters under combined stress tests (Ikegami), March, 127
Zinc coatings
Hydrogen embrittlement of zinc coatings (Horvick), Sept., 315
